

INTRODUCING STAINLESS STEEL ADJUSTABLE PROBES!

**BETTER THAN
PLASTIC!**

A BETTER TYPE OF PROBE FOR HOLE INSPECTION

Techna NDT introduces its latest development of adjustable diameter holes. These probes make a powerful addition to any NDT shop looking to save costs and increase productivity. These probes are in use at several locations and are recommended by Boeing and others. Techna NDT also offer standard split shaft probes in stainless steel as well as common solid shaft stainless steel probes.

With our SS Adjustable Probes you get the following features!

- Increase wear over standard plastic body probes
- Reduced need to ream rough holes
- Infinite adjustability for oversize holes
- Conforms to oblong or misshapen holes
- Ferrite shielding to increase sensitivity
- Made to fit all competitors instrument and scanner equipment
